7.2.1 BEST PRACTICE NO.2 : COMPUTER SKILLS FOR STUDENTS

Goal:

To equip students on Information Technology skills so that students can able to work with computer comfortably and can able to get advanced information for competitiveness, entrepreneurship and higher education, etc.

The Context:

Present situation of information is concerned, the job market, entrepreneurial setup Industries, Governments, etc., are very much dependent on Information Technology. In view of this, institution felt it essential to help students to get computer skills. B.A.-IV semester students study Computer Application as compulsory subject introduced by University with only theory.

Just to get practical exposure alongwith theoretical concepts, and in every competitive examinations conducted by Government of Karnataka and any other organizations, questions on computer skills are going to be asked in almost all competitive examinations. This has motivated Institution to facilitate students with well equipped computer lab. Along with B.A.-IV semester students, students who opted Computer Science and remaining students could able to get minimum knowledge on computer skills. Basic Computer skills has enabled to nurture students to get acquainted with minimum computer skills so that students would get benefitted with this essential knowledge.

The Practice:

To help students with computer knowledge, a separate qualified, experienced and committed teacher have been appointed. Students of B.A.-IV semester, even though they have a subject theory based but without practical. After the completion of regular college classes, a separate batch-wise time-table is organized for the students so that, they can attend computer lab for the practices. Classes with demonstrations are conducted regularly. Work assignments are given to students to practice the same in computer laboratory. Library has sufficient books on computer skills. With minimum fee structure, students who want to get advanced skills, they can be asked to enroll for the course. The course is running based on the minimum strength of enrollment. Most of the students who opted for Mass Communications and Journalism and some of the students have opted this course. Students are enlightened and exposed to utilize Internet connectivity so that students can be download academic information and upload personal information for the job sites.

Evidence of Success:

The very course and infrastructural facility has encouraged students to utilize the available resources optimally. Students of Journalism, 2nd and final year students have taken maximum benefits with these provisions. Students of Journalism, B.A.- IV semester, and rest all students have utilized optimally. This has help most of the students in getting appropriate information and enabled them to get connected to anyone.

Problems Encountered and Resources Required:

Finance is the main constraint. Our students are most of them are from village background and economically below line of average. Institution has taken up the responsibility in establishing computer laboratory, providing internet connectivity, placing order for computer related magazines, proper guidance while practicing, payment to the guest faculty, etc., became challenging for the institution to sustain the purpose of this course.
